

# jTumbler jQuery Plugin

Version 1.0.4

Thank you for purchasing jTumbler! Please read this document carefully for information on the contents of the archive and usage of jTumbler plugin.

## Contents of the Archive

In this archive you will find the jQuery framework (version 1.11.1), jTumbler JavaScript source code (normal and minified versions), jTumbler CSS, documentation and demonstration files. Below is list of all files in the archive:

- **/js/**  
This directory contains the JavaScript source files for jTumbler and the jQuery Framework.
  - **jquery-1.11.1.min.js**  
Minified version of jQuery Framework 1.11.1. If you don't have the jQuery framework installed on your website pages, you may use this file; otherwise this file can be skipped.
  - **jquery-jtumbler-1.0.4.js**  
Source code of jTumbler. This version of the plugin can be used if you would develop functionality on top of the jTumbler plugin and need to inspect / view source code. For production purposes you should use the minified version of the plugin.
  - **jquery-jtumbler-1.0.4.min.js**  
Minified version of jTumbler plugin. This version of the plugin should be used for production purposes (i.e. on the live website.)
- **/css/**  
This directory contains CSS (Cascading Style Sheets) for the jTumbler plugin.
- **/demo/**  
In this directory you will find examples on how to use jTumbler and demonstrations of various modes the jTumbler plugin provides.
- **/docs/**  
Please see this directory for more detailed information about jTumbler's settings.

## Quick Usage

It takes very little time to get started with jTumbler; simply follow the four steps below. For more information about any of these steps, read the sections that follow.

To add jTumbler to a page:

1. Download the zip archive, extract the jTumbler script, jQuery, and jTumbler CSS files. Upload these files to the corresponding directories on your server.
2. If you already have jQuery installed, just be sure you are using the latest version (jTumbler requires jQuery version 1.11 or higher). Otherwise, you can find jQuery 1.11 in the "js/" directory of the jTumbler zip archive.
3. Use the lines of code below to add jQuery 1.11, the jTumbler script, and the jTumbler stylesheet to your page. These lines usually go in the **<head>...</head>** tag.

```
<script type="text/javascript" src="js/jquery-1.11.1.min.js"></script>
<script type="text/javascript" src="js/jquery-jtumbler-1.0.4.min.js"></script>
<link rel="stylesheet" href="css/jtumbler.css" />
```

4. Use the following code to initialize jTumbler. This code can be placed anywhere in the page, as long as it appears after the code from step 3.

```
<script type="text/javascript">
  jQuery(function($) {
    $(".container").jTumbler();
  });
</script>
```

5. Refer to the demonstration files (see "demo/" directory) for more advanced usage of the plugin.
